Region scorecard, all 36 months

Region	Revenue	Paid orders	AOV	Profit margin	New customers	Marketing spend*	CAC*
North	₹74.8 L	2,272	₹3,293	33.3%	680	₹5.9 L	₹866
South	₹93.8 L	2,770	₹3,385	32.7%	780	₹7.2 L	₹922
East	₹48.3 L	1,372	₹3,520	32.3%	438	₹3.8 L	₹859
West	₹63.9 L	1,901	₹3,362	32.6%	564	₹5.0 L	₹880
Central	₹31.1 L	916	₹3,400	32.1%	273	₹2.5 L	₹899
Unknown	₹12.8 L	398	₹3,212	33.2%	131	₹1.1 L	₹821
Total	₹3.25 Cr	9,629	₹3,372	32.7%	2,866	₹25.3 L	₹884

* Illustrative marketing spend (see page 3).

Synthetic data | Marketing spend is illustrative | Revenue = Paid orders only

KPI dictionary (see Task 2 for the full dictionary and data-quality contract)

KPI	Definition / formula	Grain	Owner (proposed)	Refresh
Revenue	Sum of order revenue (after discount), Paid orders only	Order	Head of Growth	Daily
Average order value	Revenue / number of paid orders	Order	Growth Analyst	Daily
Customer acquisition cost	Marketing spend / new customers (first paid order in period)	Customer	Marketing Lead	Monthly
Churn rate (monthly)	Active last month but now inactive (180 days no purchase) / active last month	Customer	Customer Success Lead	Monthly
Gross profit & margin	Revenue - (cost_price x quantity); margin = profit / revenue	Order	Finance Controller	Daily
New customers	Customers whose first paid order falls in the period	Customer	Marketing Lead	Monthly
Active customers	Customers with a paid order in the trailing 180 days (month end)	Customer	Customer Success Lead	Monthly
Paid orders	Count of orders with payment status Paid	Order	Retail Operations	Daily

Dashboard design (visual hierarchy)

1) Four headline KPIs with trend sparklines and change vs the previous period at the top; 2) four supporting KPIs as compact tiles; 3) the trend and the regional heatmap as the main analysis; 4) customer economics (acquisition, churn) and the category mix below; 5) detail views (seasonality, products, scorecard) last. Colour is used sparingly: blue = revenue, green = profit/health, orange = cost, red = risk.

Interactivity in the live app

Slicers: period range, quick ranges, region, category, payment method. Drill-down: Year -> Quarter -> Month -> Day on the trend chart; Category -> Product on the sunburst; map metric selector. This PDF is a static export of the default view and of one drill path (2025 -> Q4 -> months).

Data limitations

The dataset is synthetic. Marketing spend does not exist in the order data: marketing_spend.csv was generated (INR 450 per acquired customer + INR 30,000 per month always-on spend, +25% in Oct-Dec), so CAC is illustrative and should be replaced by real spend. New customers decline sharply over time because the data draws buyers from a fixed pool of ~3,000 customer IDs; in real data this would be a serious warning about acquisition. Churn needs 180 days of history, so it starts in Jul 2023.

Regions

Regions in the data are sales zones, drawn here as groupings of Indian states (North, Central, East, West, South). Orders with an unknown region (~4%) are excluded from the map. A customer's region is the region of their first order. Boundaries: udit-001/india-maps-data (public), dissolved to zones and simplified.
